## MOBILE APP DEVELOPMENT SERVICES " Android "

The screenshot displays the iflexion.com website with a green header. The main content area is titled "TECHNOLOGY STACK" and lists various technologies used in Android development. The technologies are categorized into four groups: Frameworks & Components, IOT, Libraries, and APIs. Each category has a list of specific technologies.

Category	Technologies
FRAMEWORKS & COMPONENTS	Android SDK, Google Cast SDK, Titanium, Android ANI SDK, Play Games SDK
IOT	Brillo, Weave
LIBRARIES	Surface Manager, Media Framework, OpenGL, SQL, SSL, SQLite, WebKit, libc, Sherlock Action Bar, FreeType
APIS	Android Pay API, Remote Display API, Game Manager API

## MOBILE APP DEVELOPMENT SERVICES " IOS "

The screenshot displays the iflexion.com website with a blue header. The main content area is titled "FROM NATIVE iOS TO HYBRID APP DEVELOPMENT AND BACK". Below the title, there is a paragraph explaining the company's approach to mobile app development. The paragraph states that the company aims to embrace iOS, Android and Windows app development in one go while preserving App Store distribution and natively sleek user interface for iPhone and iPad users. It also mentions that iflexion is well-versed in combining the best of native and HTML5/JavaScript worlds, tapping hybrid app development frameworks and technologies, including:

APACHE CORDOVA™, Xamarin, PhoneGap, Sencha, titanium, ionic

## WEB APPLICATION DEVELOPMENT

The screenshot shows the 'iflexion.com/services/web-application-development' page. The navigation bar includes 'COMPANY', 'EXPERTISE', 'SERVICES', 'PORTFOLIO', 'BLOG', and 'CONTACT US'. The main heading is 'TECHNOLOGIES'. Below it, a paragraph states: 'Iflexion's technology competency goes far beyond what is typically expected of "a web app development company". Our long-established technology competencies are centered around:'. This is followed by a row of six technology logos: 'FRONTEND' (with a code icon), 'Microsoft .NET', 'php', 'Java', 'RAILS', and 'python'. Below this is a 'RELATED PROJECTS' section with a featured project titled 'News Portal Development for European Media Agency' over a background image of financial data.

## Cloud

The screenshot shows the 'iflexion.com/cloud-solutions' page. The navigation bar is similar to the previous one, but 'EXPERTISE' is highlighted. The main heading is 'END-TO-END CLOUD-FIRST APPLICATION DELIVERY'. A paragraph explains: 'Not all workloads are equally appropriate for the cloud, and we account for it. We help you identify and prioritize the most promising candidates, thus, beginning our cooperation with a sound cloud strategy, select a computing model that suits your business, deliver a proof of concept and ultimately build a cloud-first application, which is designed to scale fully, quickly and reliably and exploit the speed, scale and efficiency of the cloud of choice.' Below this is a three-step process diagram: 01 ASSESS (Strategy, Cloud selection, Application assessment, Proof of concept), 02 BUILD (Application development, Application testing, Application integration, Application deployment), and 03 RUN (Application management, Application maintenance and support, Continuous improvement). At the bottom, a row of cloud provider logos is displayed: Microsoft Azure, rackspace, IBM Bluemix, amazon EC2, apprenda, and heroku.

## FRONTEND DEVELOPMENT

The screenshot displays the Iflexion website's frontend development section. At the top, it features the logos for HTML5, CSS3, and JavaScript. Below these, a row of logos for various frameworks and libraries is shown: Bootstrap, jQuery, AngularJS, Kendo UI, and Foundation. A text block states: "Iflexion leverages Twitter Bootstrap, a go-to front-end development framework, to deliver responsive, cross-browser and cross-device compatible web applications and portals." This is followed by the text "...AND MANY MORE..." and a grid of additional logos including Lo, Underscore.js, jQuery, Handlebars, Breeze, and Modernizr. A second row of logos, including Marionette, Backbone.js, and others, is also visible. The browser's address bar shows the URL "iflexion.com/frontend-development".

# RUBY ON RAILS DEVELOPMENT

IFLEXION

COMPANY EXPERTISE SERVICES PORTFOLIO BLOG CONTACT US

Our Ruby on Rails experts implement custom APIs or 3rd party integrations, spanning social networks, payment systems, mapping systems and business tools.

[Download this video](#)

### Custom API Development

IFlexion leverages Rails API to facilitate the implementation of custom stateless APIs on Rails-based projects and spin up functional endpoints for businesses of any size in a short period of time. We utilize Active Model Serializers to format the output, or JBuilder's templates in more complex scenarios where helpers and conditions are required when serving data-rich responses.

### 3rd Party Integration

IFlexion's Ruby on Rails development team can integrate virtually any API into your application, including legacy SOAP ones. Our custom integration solutions leave external API calls outside of the main request/response flow, ensuring ultimate performance, and enrich web applications with necessary 3rd party data, delivering timely results that your users expect.

10 years of experience

19 person-years for largest project
